ELEVATIONS

All elevations are referred to high water and are expressed in feet and by contour lines showing successive differences of 100 feet

Compiled from Chart #8306 of the U.S. Coast and Geodetic Survey and other sources (1907) & 1916

AUGUST 1928 — BLUE: water — GREEN: ice — RED: glaciers discharging bergs.

1925–28

Grand Pacific Glacier	receded	approx. 300ft.	Centre throwing bergs.	
Margerie	"	" 400 "	" " "	
Lamplugh	"	" very little	" " "	
Reid	"	"	" " "	held by terminal moraine
Rendu	"	" as shown	dead	
John Hopkins	"	" "	"	
Carrol	"	" "	throwing small bergs in centre	
Geikie	"	" "	dead	
Muir Inlet	as shown			

To Accompany Report to Chief Engineer Dated August 28th 1925

A.P. Forde

District Engineer

Victoria B.C.

ENLARGED DETAILS

Scale: 600 Feet = 1 Inch

GRAND PACIFIC GLACIER

Ice Front 1912

River flowing from under glacier

Sand and Gravel bank projecting from under glacier

Forde River

Rock and Gravel banks 200 to 400 ft high

CANADA

BRITISH COLUMBIA

Soft Glacial Mud

Deep Water Basin

HEAD OF TARR INLET

Sand and Gravel

Approx. High Water Mark

To Boundary Turning Point No 161. Elevation 6880 ft.

INTERNATIONAL BOUNDARY

ALASKA

(UNITED STATES)

To Boundary Turning Point No 160. Elevation 8214 ft.

Boundary Monument erected August 1925.
